

May 2013 Dayflow Update/Correction

It was brought to our attention that there was an error in the Export/Inflow Ratio (EXPIN). The equation should read $EXPIN = (QCVP + QSWP - BBID) / QTOT$. Byron Bethany Irrigation District (BBID) should be subtracted from Clifton Court Forebay inflow. We took this opportunity to re-run water years 1997-2012 to update EXPIN and to correct the double accounting of BBID which was found in the Fall of 2010. BBID is subtracted from gross channel depletion which can be found in [Table 3](#). Updated Dayflow data sets for water years 1997-2012 are now available at the Dayflow website <http://www.water.ca.gov/dayflow/output/Output.cfm>.
